

## LifeLocator® deployed immediately to save lives in the area of the China earthquake.

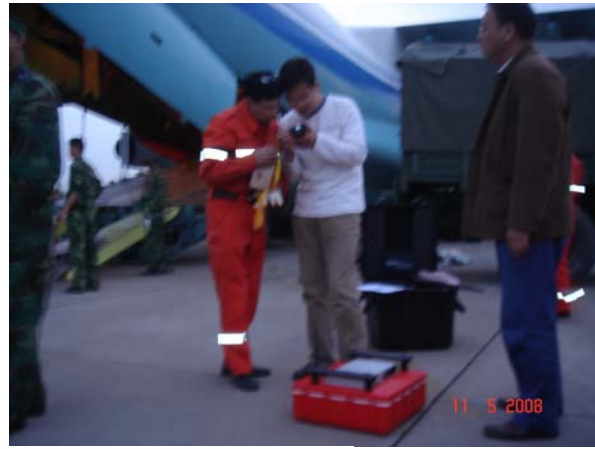

Various Chinese fire departments and rescue organizations purchased 50 LifeLocators over the past 2 years from UltraVision.

That vision and commitment to new technology paid off when the earthquake devastated a large area of Sichuan Province.

Over 25 units are confirmed in use within 3 days of the earthquake.

These two pictures show the rescuers and LifeLocator being staged at a Beijing airport within hours of the quake.

# LifeLocator®

...sensing life in a heartbeat

These pictures show a unit in use on a collapsed hospital in city of Du Jiang Yan, Sichuan Province.
